3x6 DIP&SMD TACT SWITCH KLS7-TS3601, KLS7-TS3603 CHANGE NOTICE

Dear Customer,

Thanks so much for your support to KLS TACT SWITCH.

We sincerely inform our **3x6 DIP&SMD TACT SWITCH KLS7-TS3601, KLS7-TS3603**, updated the mold.

Due to aging of mold, low efficiency can't meet the production requirements. Our company has opened a new mold, and the new mold is designed for the joint production mold. The assembly process is also changed from manual assembly to automatic production. As the technical requirements, some parts of products are adjusted in detail (figure below), but it does not affect the product's external size and performance requirements.

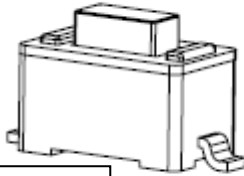

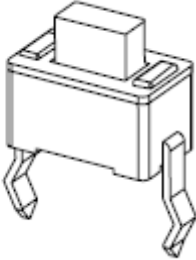

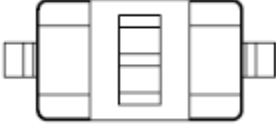

The new mould products are more stable in size and quality, good in consistency and have been mass-produced.
